

## Multiple Dwelling Unit C-Series Box

High Security Enclosures

High security enclosures to protect and secure coaxial, fiber cable and connections to multiple dwelling applications such as apartments, hotels and other high-density subscriber environments. Lock panel color coded marked for easy key identification. Housing can be replaced without disturbing wall-mounted back-plate, conduit and connections. Ideal for use in areas where connection security and theft are a concern.

### FEATURES

- ◆ High-security design to prevent theft
- ◆ "Box in a box" construction minimizes pry-points
- ◆ Most have industry standard DX key series, others available upon request
- ◆ Lock panel color coded to key, makes key identification easy
- ◆ Red=DX-23, Gray=DX28, White=DX-9, Follows electrical color code standard
- ◆ Housing can be replaced if damaged without disturbing back-plate, connections or conduit
- ◆ Star-plate can be adjusted to allow best use of internal space
- ◆ Many sizes available, from 12"x12" to 24"x18", Depths 8" and 10"
- ◆ UV protected powder-coat finish, electro-static applied
