

Government Buildings

- 1 Local, State, and Federal Buildings
- 2 Courthouses

About Us

Myers Emergency Power Systems has been in the business of manufacturing backup emergency power products for over 60 years. We provide emergency power solutions for the lighting, traffic, and broadband industries.

Inverters for Emergency Lighting

Myers EPS has the widest selection of inverters as well as some of the smallest footprints in the industry. It is necessary for government buildings to have emergency lighting to help people safely evacuate the building during an emergency situation. Myers EPS offers inverters that can be conveniently mounted onto existing light fixtures. This means there is no need to compromise when it comes to intent and aesthetics of a space.
