

## About Us

Myers Emergency Power Systems has been in the business of manufacturing backup emergency power products for over 60 years. We provide emergency power solutions for the lighting, traffic, and broadband industries.

## Healthcare Centers

- 1 Doctor Offices
- 2 Medical Offices
- 3 Blood Banks

## Inverters for Emergency Lighting

For Healthcare Centers, it is necessary to have emergency lighting in order to safely navigate the work place and avoid obstacles while exiting the building. If units do not function when they are needed most, this can cause staff and patients to be left in the dark. Our Myers EPS inverters include self-testing and diagnostics. This takes away having to schedule regular inspections, while also giving you peace of mind during a crisis situation knowing that your inverters will be up and running.
